Dandelion Sphere

NDS series

Function

A pulsating sphere of interconnecting discs of water, the Dandelion Sphere closely resembles a modern sculptured piece when not in use as a water feature. Ideal in enclosed malls, foyers and areas which are free of wind. Breathtaking when illuminated. **Not water level dependent.**

- Visibility
- Sound Level
- Wind Resistance
- Splash/Mist

Specification:

Construction shall be cast bronze, machined brass and copper. DEFO nozzles are easily cleaned, individually adjustable and removable.

Options:

(Add suffix)
 B - stand (provide details)
 Q - chrome plated

Note:

(for optimum effect)
 Requires fine screening at pump 1/6" (.063"/1.5 mm) openings.
